

What if students don't prepare? Suggestions

Challenge	Work around (solution)
Students do not prepare	<ol style="list-style-type: none"> 1. Identify students who don't complete precourse work and have a conversation (after class of next week). Make a plan together, use collaboration culture 2. Review your pre-class assignment: is it too much, too hard, unclear? – adjust if appropriate. 3. Important: Follow-on as planned, recognize students who are prepared and create discussion. <u>Do NOT re-cover yourself the basics and assignments in class</u> 4. Peer pressure (Group work relies on preparation) 5. Incentives: Grades rely on regular pre-course work 6. Tell stories and quote students who see the benefit – we all have to learn and work in new ways. Refer to skills of 21st century learners 7. Hard way: Set up a corner for the unprepared students. There they do the assignments now and have to figure out the in-class work on their own afterwards
